

Pijush Chakma

SOFTWARE ENGINEER

+8801610924816 | pijushchakma120@gmail.com | github.com/Pijushchakma | linkedin.com/in/pijush-chakma

Personal Profile

A skilled software engineer proficient in Python, JavaScript, React, Next.js, FastAPI, MongoDB, and Tailwind CSS. A quick learner with strong **communication** and **self-management skills**, experienced in remote collaboration. Seeking a **remote software engineering role** to leverage technical expertise and contribute to impactful projects.

Work Experience

Cognitus | Team lambdax

Dallas, United States

Software Engineer (Remote)

Nov 2024 - Present

- Developed and maintained scalable backend services using **FastAPI**, **PostgreSQL**, and **SQLAlchemy** for contract management automation.
- Built interactive and responsive **React.js** frontend interfaces with **Tailwind CSS**, ensuring seamless user experience.
- Optimized database queries and API performance, enhancing efficiency and reducing response times.
- Integrated backend and frontend services, improving automation workflows and system reliability.
- Collaborated effectively with remote teams**, ensuring clear communication and alignment on project goals.
- Self-managed tasks and deadlines** in a remote environment, delivering high-quality results on time.

Reve Systems

Dhaka, Bangladesh

Software Engineer

Nov 2022 - Oct 2024

- Developed and delivered multiple Speech-to-Text (STT) and Text-to-Speech (TTS) solutions for the ICT division of the Bangladesh government, including **Kotha** and **Uccharon**.
- Resolved over **100+ issues** and implemented key improvements, significantly enhancing functionality and stability across web and desktop applications (Windows, Linux, Mac).
- Integrated ONNX-based lightweight TTS models for offline functionality in desktop applications.
- Developed TTS browser extensions for Chrome, Microsoft Edge, and Firefox, ensuring broad website compatibility (excluding Google services).
- Designed and optimized **Amarkantho** (STT Voice Collection Tool) and **Sukantho** (TTS), improving voice data accuracy by **40%** and reducing processing time by **25%**.

Projects

JobPrepBD - Job Preparation Platform

Dhaka, Bangladesh

Personal Project

[link](#)

- JobPrepBD is a free online platform tailored to help job seekers in Bangladesh prepare effectively for various government and private sector exams. With access to previous years job questions and solutions, study materials, and an MCQ practice system with live rankings, candidates can sharpen their skills and track their progress. JobPrepBD also features a blog section with valuable insights and career tips, along with up-to-date job circulars, making it a one-stop resource for job preparation.
- Self-managed the entire project lifecycle**, from planning to deployment, ensuring timely delivery
- Technology Stack:** Next.js, TypeScript, Tailwind CSS, FastAPI, Docker

Bangla Media Links - Hub for Bangladeshi Media

Dhaka, Bangladesh

Personal Project

[link](#)

- Bangla Media Links is a centralized platform that aggregates links to all major media sources in Bangladesh. Built with Next.js, React.js, and Tailwind CSS, this website serves as a comprehensive directory for daily newspapers (Bengali and English), regional newspapers, magazines, TV channels, educational websites, YouTube channels, and share market news channels. It provides users with easy access to a wide range of media resources in one place.
- Technology Stack:** Next.js, TypeScript, Tailwind CSS

Trippy
